Evergreens

UR evergreens are all grown in our own Nursery on an ideal clay soil which is prepared with great care. They are frequently sheared to make compact specimens, and transplanted often to stimulate fiborous roots close to the plant.

The clay soil in which our plants are grown is just right for balling. Each plant is carefully and freshly dug, properly balled and burlapped to insure successful planting.

WE SPECIALIZE IN THE PRODUCTION OF HIGH GRADE SPECIMEN EVERGREENS

In making comparisons do not consider prices only, be sure you are buying frequently transplanted, carefully pruned, true to name stock, dug and handled under proper conditions.

We would like for you to visit our Nursery and inspect our plants; they must be seen to be appreciated.
